Education

Universidad de las Américas (UDLA), B.S. in Software Engineering	Expected May 2027
--	-------------------

Experience

UNIFCOM (Connecticut, USA - Remote), Software Engineer (Backend)	Sept 2025 – Present
--	---------------------

- Designed and developed secure, scalable REST APIs for multi-company e-commerce platforms using Python, Odoo 17, and PostgreSQL.
- Implemented complex business logic, access controls, and authentication flows for critical integrations including payments, inventory management, and multi-brand architecture.
- Managed cloud infrastructure and deployments via AWS (S3, EC2) and Odoo.sh, ensuring high system availability and optimal backend performance.

Freelance Odoo Developer – Independent Projects	Jan 2024 – Jul 2025
---	---------------------

- Developed and customized Odoo modules (v14–v16) to tailor enterprise systems to specific client operational requirements.
- Created functional applications for inventory control, CRM, user access management, and automated business reporting.

Projects

Speech Recognition System	github.com/byPronox
---------------------------	---------------------

- Engineered a speech recognition system leveraging neural network architectures.
- Technologies: Python, TensorFlow

Quantitative Risk Management System	github.com/byPronox
-------------------------------------	---------------------

- Developed a full-stack, microservices-based application for quantitative risk assessment and mitigation.
- Technologies: React, Tailwind CSS, FastAPI (Python), Scikit-learn, PostgreSQL, Docker, RabbitMQ

SaaS RAG Platform for E-commerce and CRM	github.com/byPronox
--	---------------------

- Designed and developed a full-stack SaaS system implementing artificial intelligence through RAG architecture, LLMs, and Machine Learning to optimize business management and automation.

Technical Skills

Languages: Python (Advanced), JavaScript, TypeScript, Java, C#, C, SQL

Databases: PostgreSQL, SQL Server, MySQL, MongoDB

Frameworks & Libraries: Odoo (v14–v17), React, Next.js, Node.js, Pandas, Scikit-learn, TensorFlow, Keras

Tools & Environments: Git, GitHub, Docker, AWS (EC2, S3), Visual Studio, VS Code, Jupyter Notebook

Agile Methodologies: Scrum, Kanban, Design Thinking

Certifications & Courses

Design Thinking and Global Startup – Korea Advanced Institute of Science and Technology (KAIST) (via Coursera)	May 2024
--	----------

Verified Certificate: W8S6YDDCDTAJ

NDG Linux Unhatched Course – Cisco Networking Academy	May 2024
---	----------

Verified Certificate: NDG Linux Unhatched

Software Processes and Agile Practices – University of Alberta (via Coursera)	Dec 2022
---	----------

Verified Certificate: 6P6V6XX22GRE
