

Stefan Jativa

Quito, Ecuador | stefanjativa@gmail.com | +593 999957571 | GitHub | Portfolio | LinkedIn

Professional Summary

Software Engineer with extensive experience in backend development, business process automation, and Odoo ecosystem implementation. Specialized in RAG (Retrieval-Augmented Generation) architectures and deploying scalable microservices using Python, FastAPI, and Docker. Passionate about building high-impact internal tools that streamline operational workflows and drive data efficiency in cloud-native environments.

Education

Universidad de las Américas (UDLA), B.S. in Software Engineering Expected May 2027

Experience

UNIFCOM (Connecticut, USA - Remote), Software Engineer (Backend) Sept 2025 – May 2026

- Engineered secure REST APIs for multi-company e-commerce platforms using Python, Odoo 17, and PostgreSQL, resulting in a 25% reduction in API response latency.
- Implemented complex business logic and automated workflows, successfully saving the operations team over 10 hours per week in manual inventory data entry.
- Managed cloud infrastructure on AWS (EC2/S3) and Odoo.sh, maintaining 99.9% uptime for critical production environments.

Freelance Odoo Developer – Independent Projects Jan 2024 – Jul 2025

- Customized and extended Odoo modules (v14–v16) for retail clients, increasing order processing efficiency by 15% through automated reporting tools.
- Designed end-to-end CRM and inventory solutions that improved lead conversion tracking accuracy by 20%.

Projects

Speech Recognition System github.com/byPronox

- Engineered a speech recognition system leveraging neural network architectures.
- Technologies: Python, TensorFlow

Quantitative Risk Management System github.com/byPronox

- Developed a full-stack, microservices-based application for quantitative risk assessment and mitigation.
- Technologies: React, Tailwind CSS, FastAPI (Python), Scikit-learn, PostgreSQL, Docker, RabbitMQ

SaaS RAG Platform for E-commerce and CRM github.com/byPronox

- Designed and developed a full-stack SaaS system implementing artificial intelligence through RAG architecture, LLMs, and Machine Learning to optimize business management and automation.

Technical Skills

Languages: Python (Advanced), JavaScript, TypeScript, Java, C#, C, SQL

Databases: PostgreSQL, SQL Server, MySQL, MongoDB

Frameworks & Libraries: Odoo (v14–v17), React, Next.js, Node.js, Pandas, Scikit-learn, TensorFlow, Keras

Tools & Environments: Git, GitHub, Docker, AWS (EC2, S3), Visual Studio, VS Code, Jupyter Notebook

Agile Methodologies: Scrum, Kanban, Design Thinking

Certifications & Courses

Design Thinking and Global Startup – KAIST (via Coursera) May 2024
Verified Certificate: W8S6YDDCDTAJ

NDG Linux Unhatched Course – Cisco Networking Academy May 2024
Verified Certificate: NDG Linux Unhatched

Software Processes and Agile Practices – University of Alberta (via Coursera) Dec 2022
Verified Certificate: 6P6V6XX22GRE
